

Title:	Information Technology Wireless Policy
Number:	701
Effective:	January 1, 2015, Revised March 19, 2019
Cancels:	N/A
Prepared by:	Josh Jacobs, Systems Administrator
Approved by:	Authority Board Resolution No. 2014-36; Resolution No. 2019-03

POL-701 INFORMATION TECHNOLOGY WIRELESS NETWORK

This policy establishes and defines the terms, conditions, and rules regarding use of Mason Transit Authority’s (MTA) wireless network (WiFi) by employees and the public.

1. Types of WiFi Networks

The Information Technology (IT) Team will design a wireless network infrastructure suitable to meet MTA’s business needs. The WiFi infrastructure may include any of the three types of subnetworks: Closed to the public, open to the public, and special purpose.

2. Closed WiFi Networks

Closed to the public WiFi networks are intended for business uses and applications, and only accessible by MTA employees for business purposes. Only devices approved by the Systems Administrator are permitted on closed WiFi networks. While connected to a closed WiFi network, all MTA policies, including the Information Technology Acceptable Use policy, is in effect.

3. Special Purpose WiFi Networks

Special purpose WiFi networks are networks established for a special purpose, such as testing functionality or for special events. Special purpose WiFi networks are limited to activities directly related to their special purpose and restricted by all applicable policies, including the Information Technology Acceptable Use policy.

4. Public WiFi Networks

Public WiFi networks are open to the public for internet access using MTA’s IT equipment and internet access. Members of the public accessing MTA’s public WiFi may be required to consent to MTA’s terms and conditions of use. Public users connect to the public WiFi with their own devices and at their own risk. MTA reserves the right to restrict access to individuals for violations of the terms and conditions of use without notice. MTA reserves the right to disable or turn off public WiFi access at any time for any reason.
